About Us

LV Solutions is a multidisciplinary infrastructure company specializing in electrical construction, civil engineering, and end-to-end project execution for India's power transmission sector. Established in 2022, the company was founded with a focus on foundation, erection and stringing works for 400kV & 765kV transmission lines.

Moto

To deliver projects in full shape within time frame, with best products / least wastage / highest safety standards and best interpersonal relationship with Clients and Consultants. Committed to make client comfortable by adhering to their time schedule by deploying the required man power.

400kV QMDC Transmission Line Tower — MEIL / Greenko Project, Madhya Pradesh

The Business

LV Solutions has built its core competence around one focused scope — civil foundation works, tower erection and conductor stringing for 400kV and 765kV transmission lines — rather than diversifying across unrelated trades.

This focused scope has allowed the company to build deep execution capability, resulting in on-time delivery across every project awarded to date, and repeat trust from leading EPC contractors including MEIL, Tata Projects Ltd. and Amara Raja Infra Private Limited.

Scope of services includes: earthwork excavation across all soil/rock classes; PCC/RCC foundation concrete (M10–M20 grades); TMT reinforcement cutting, bending & placement; pile foundations up to 1000mm dia; stub setting & tower erection; pipe/rod/counterpoise earthing; and conductor stringing.

Tata Hitachi Excavator — Foundation Site

Concrete Mixer — Foundation Pour

The Infrastructure

- LV Solutions maintains full in-house infrastructure for turnkey execution of transmission foundation projects, with all required tools, tackles and machinery.
- Modern fleet ready for multi-site deployment: 6 Excavators, 6 Ajax concrete mixers, and 4 JCB backhoe loaders.
- Capable of deploying Engineers, Supervisors, Skilled, Semi-Skilled and Unskilled workers to multiple sites at short notice — current strength 300+.
- Proven capability to mobilise for single transmission line packages valued at ₹30+ Crore.

JCB Backhoe Loader — Site Excavation

Ajax Concrete Mixer Unit

Testimony

LV Solutions secures repeated orders from clients due to performance.

Achieved only because of the commitment to project execution by ensuring quality, time, work ethics and safety. LV Solutions has created a habit of making clients comfortable by accepting, adhering to and adopting the business standards of clients and consultants — reflected in its recognition as **"Best Contractor of the Year 2024–25"** by Megha Engineering & Infrastructures Limited (MEIL).

National Safety Day Recognition — MEIL, 400kV QMDC Line

Our Clients & Live Projects

Current live order book of approximately **₹56.16 Crore**, executed concurrently across five states:

Contractor	End Client	Project	Value
MEIL	Greenko	400kV QMDC Tr. Line Foundations, MP	**₹14 Cr**
Tata Projects Ltd.	Sterlite	765kV AL59 Foundation Works, AP	**₹1.16 Cr**
Amara Raja Infra Pvt. Ltd.	Serentica	Annigeri 400kV & 220kV TL, Karnataka	**₹16 Cr**
Amara Raja Infra Pvt. Ltd.	OPTCL	400/220/33kV Neulpoi S/S, Odisha	**₹20 Cr**
Lakshmitranscon	Adani Group	Transmission Line Foundation Works	**₹5 Cr**
TOTAL LIVE ORDER BOOK			**₹56.16 Cr**

All five packages are being executed in parallel by dedicated site crews — demonstrating LV Solutions' capability to run multiple 400kV/765kV foundation contracts concurrently without compromising quality or schedule.
